Domain Introduction : Web Application

“A web application or web app is a client-server computer program which the client runs in the web browser.”

➡ 1.1 Applications:-

- i. Google Docs
- ii. Pixlr.com
- iii. Flipcart
- iv. Book My Show
- v. OLX

System Study

Existing System

- Existing system of system of project management is manual.
- Project coordinator or guide gives task for student manually.
- Project work done by students submitted to guide & coordinator manually.
- User cannot manage project development easily to achieve the main goal.

Drawbacks of Existing System

- It is time consuming.
- Right information is not retrieved at right time.
- Any updates to the data by team members or the Project coordinator or guide cannot see immediately by the rest of the team.
- All work is done manually.

“

Introduction

“Academic Project Management System”

”

5

Project management system is a system for managing, controlling, monitoring the academic projects of students.

It is a web based portal or application which is useful for students, project coordinator and project guide.

Problem Statement

“Develop a system for managing, controlling and monitoring the projects of students.”

Relevant Objectives

- ❑ Reduces the extra time and efforts required to manage and monitor projects.
- ❑ Helpful to control, manage and monitor the project.
- ❑ Provides a good interface which is easy to understand.
- ❑ Reduction in manual work.
- ❑ Up-to-date status reporting, ease of use, backup.

Proposed System

- In this proposed system we can implement a system which manage project related all work done by students and given by project coordinator or guide.
- Coordinator updates project related information, view work done by a student at which time.
- Student retrieved the given work information updates and complete this work at given time and submits into the project management system

Information Gathering & Analysis

➤ Student :-

- i. Detailed information of student
- ii. Group Formation
- iii. Upload and view files
- iv. Get the status of the project

➤ Project Guide :-

- i. Detailed information of guide
- ii. Allocated group details
- iii. Upload and view files
- iv. Upload the status of project

➤ Project Coordinator :-

- i. Detailed information of coordinator
- ii. Guide allocation
- iii. Upload and view files
- iv. Upload the status of project

➤ Head Of Department :-

- i. Detailed information of HOD
- ii. Upload and view file
- iii. Upload the status of the project

Modules

➤ User Validation:-

- i. Registration
- ii. Validation
- iii. Role Of logger

➤ Group Creation:-

- i. Student Registration
- ii. Group Formation

➤ Guide Allocation:-

- i. Group Validation & assigning group id
- ii. Guide Assignment

➤ Project Record :-

- i. Upload Files
- ii. View File
- iii. Download File
- iv. Delete File
- v. Correct Comment
- vi. View Previous Record

Requirement Analysis

Requirements

- Students & Guide, Coordinator or HOD should be able to communicate.
- Should reduces the manual work.
- Registration of students, guide, coordinator & HOD should be done with detailed contents.
- Should be able to upload and view the files.
- Should maintain all the data.
- Should record all the project related information.

Feasibility Study

➤ Economical :-

All the resources used for developing this application are open source & hence no cost is needed for the resources.

➤ Time :-

This application reduces the manual work.

Software Requirement Analysis and Specification

Functional Requirements

- Registration
- Group Formation
- Guide Allocation
- Project Status
- Information Retrieval

Non-Functional Requirements

- Usability
- Scalability
- Reliability
- Availability

Software Requirement Analysis and Specification

Software Requirements

- Operating System :- Windows XP & above
- Front End :- HTML5 & CSS
- Back End :- PHP
- Database :- MySQL
- Server :- Xampp

Hardware Requirements_(Development)

- Storage :- Minimum 1 GB
- RAM :- Minimum 512 mb

Project Scope Statement & Analysis

- ✓ System will accept the project group wise data. Project coordinator can assign guide to each project group. Project guide and coordinator both can give suggestions to group. Students can upload there work on this application.

Project Boundaries

- The current system is developed for single department of college i.e. "Department Of Computer Science And Technology, TKIET, Warananagar".

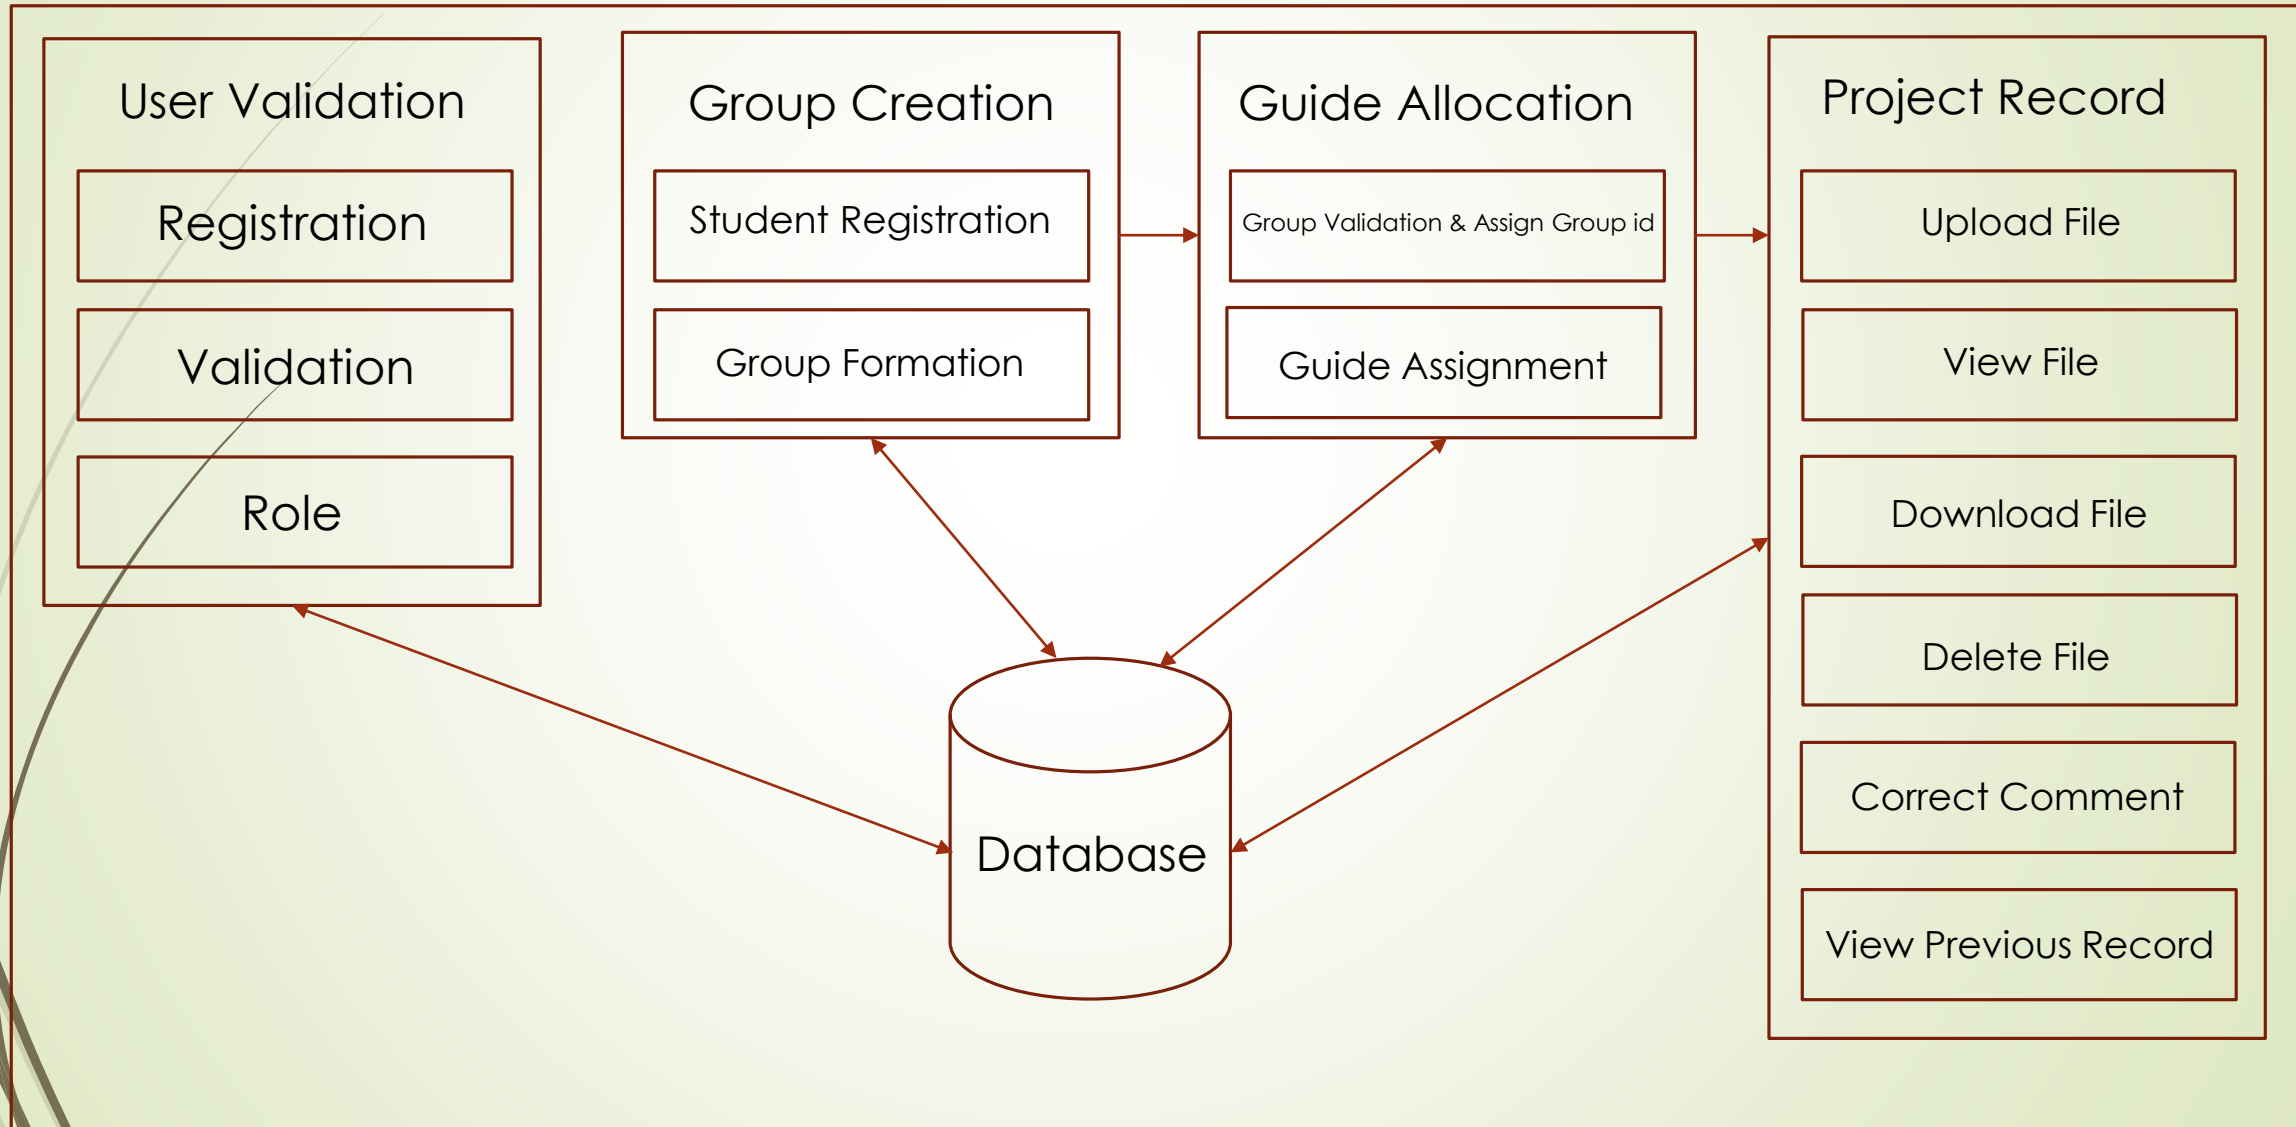

Project Charter

- **Project Title** :- Academic Project Management System
- **Project Start Date** :- December 2018
- **Project End Date** :- March 2019
- **Project Guide** :- Prof. K.N.Kamble
- **Project Objectives** :-
 - Helpful to control, manage and monitor the project.
 - Reduction in manual work.

Screenshots

The screenshot shows a web browser displaying the APMS (Academic Project Management System) website. The page has a dark grey background with white text. At the top, there is a navigation bar with a logo on the left and a list of menu items: HOME, ABOUT, HANDBOOKS, DOCUMENTATION, HISTORY, PHOTO GALLERY, GUIDE, TEAM, STATS, and CONTACT. Below the navigation bar, the page is divided into two main sections. The left section is titled 'APMS' and contains a description of the system, an address, and contact information. The right section is titled 'CONTACT US' and contains a contact form with three input fields: 'Full Name', 'Email Address', and 'Message...'. A 'SEND' button is located at the bottom right of the contact form. Social media icons for Facebook, Twitter, Google+, and YouTube are located at the bottom left of the page.

 **APMS**

Academic Project Management System is a system for **managing, controlling & monitoring** the projects of student.
